

# Criação do Detalhe do Álbum

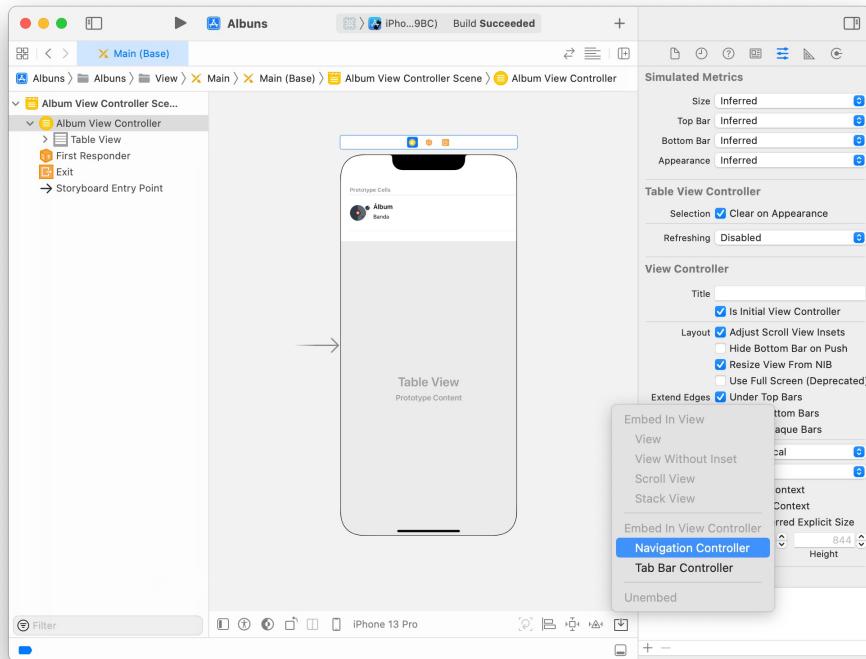

## Configuração de um Table View Controller estático

Acompanhe agora um passo a passo para criar um Table View Controller estático em uma aplicação

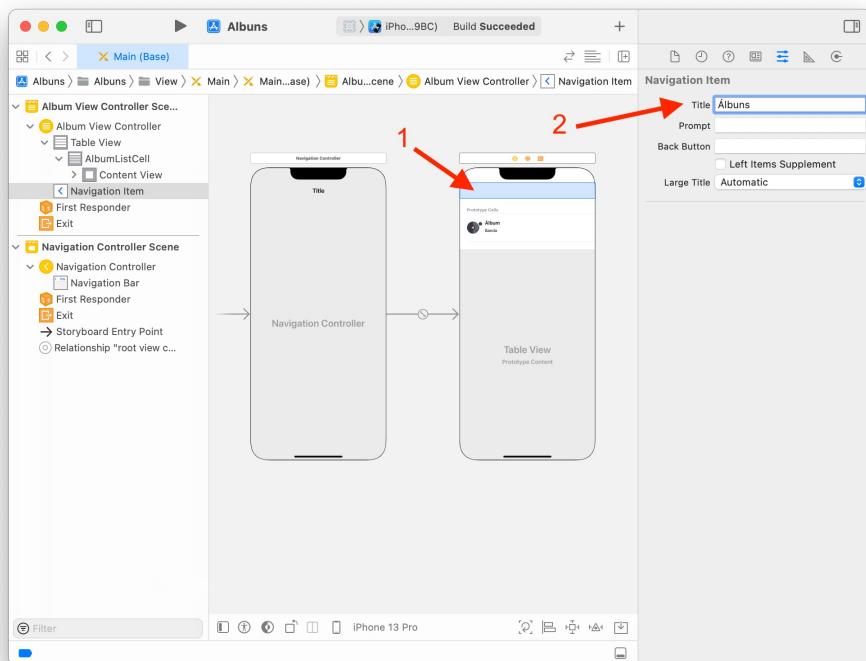

Abra o arquivo main.storyboard, selecione o Table View Controller e clique no botão de embrutar.

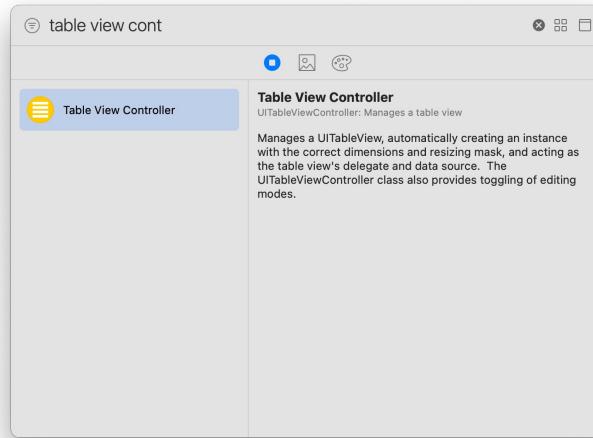

## 2. Selecione o item Navigation Controller.

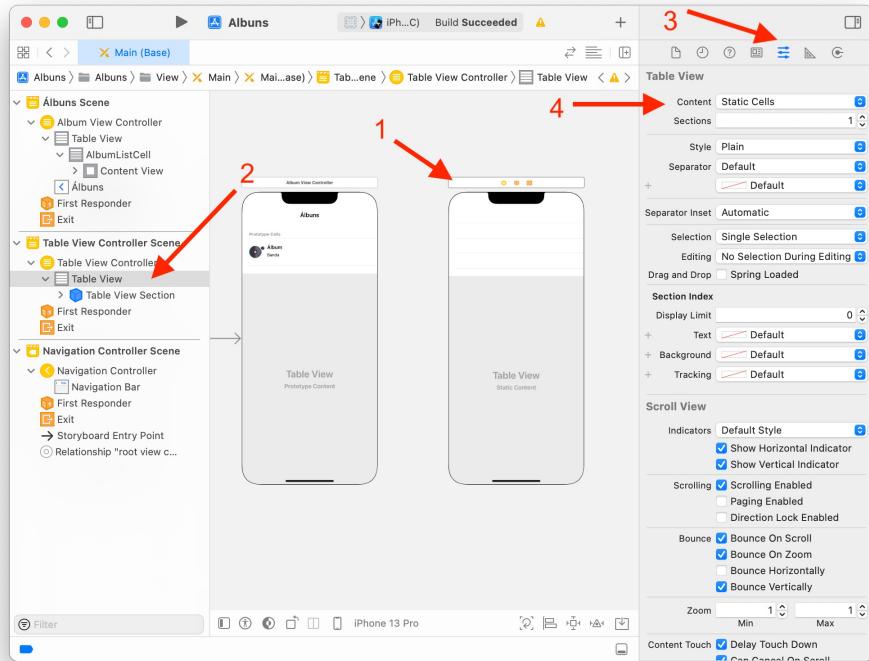

## 3. Selecione a barra de navegação e atribua o título.

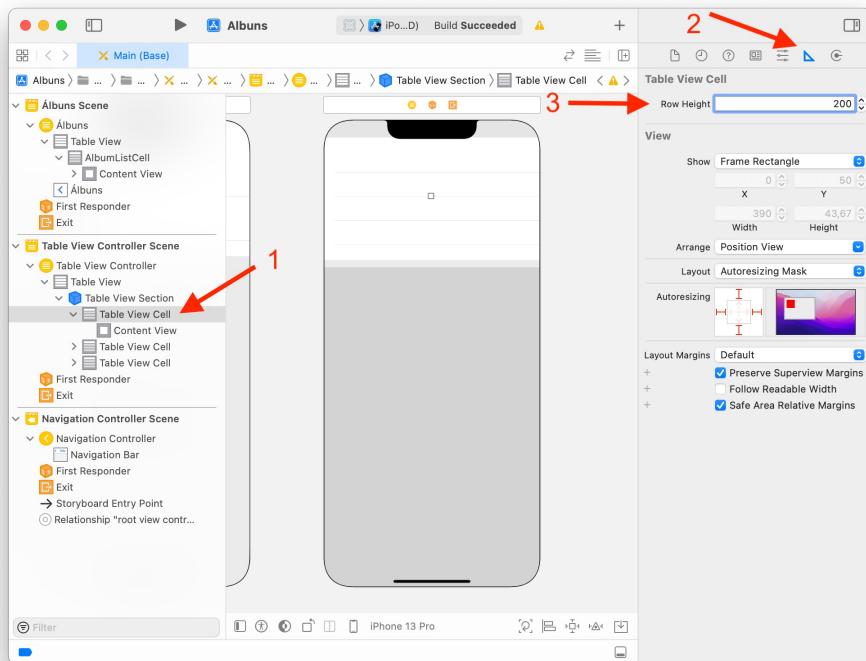

#### 4. Adicione um Table View Controller.

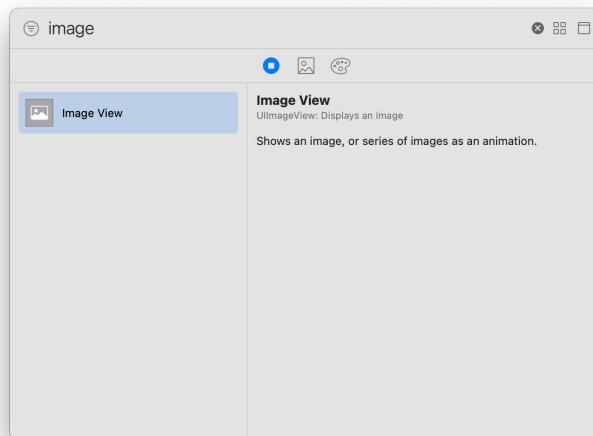

#### 5. Selecione o Table View e troque o tipo do conteúdo dele para Static Cells.

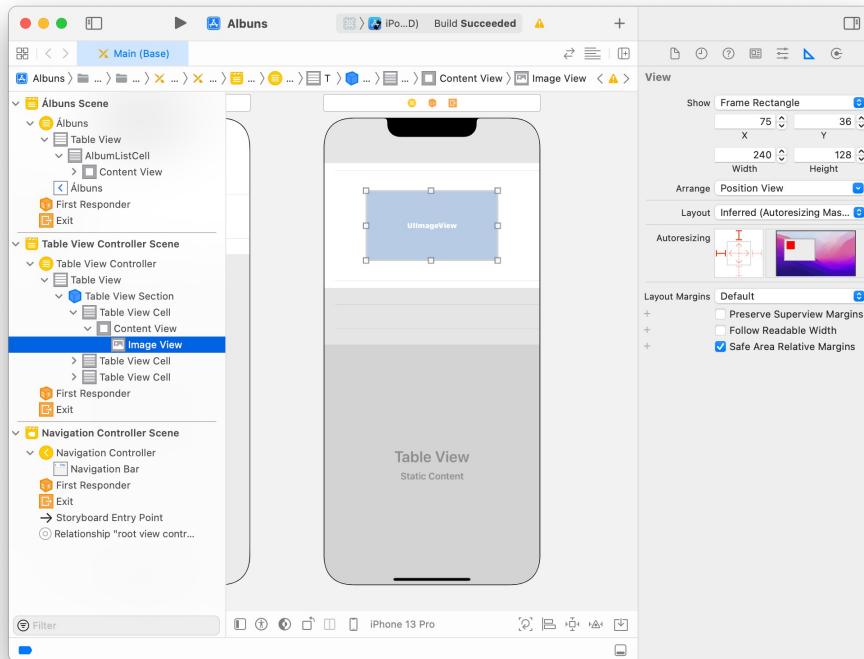

6. Selecione o primeiro Table View Cell e ajuste sua altura para 200.

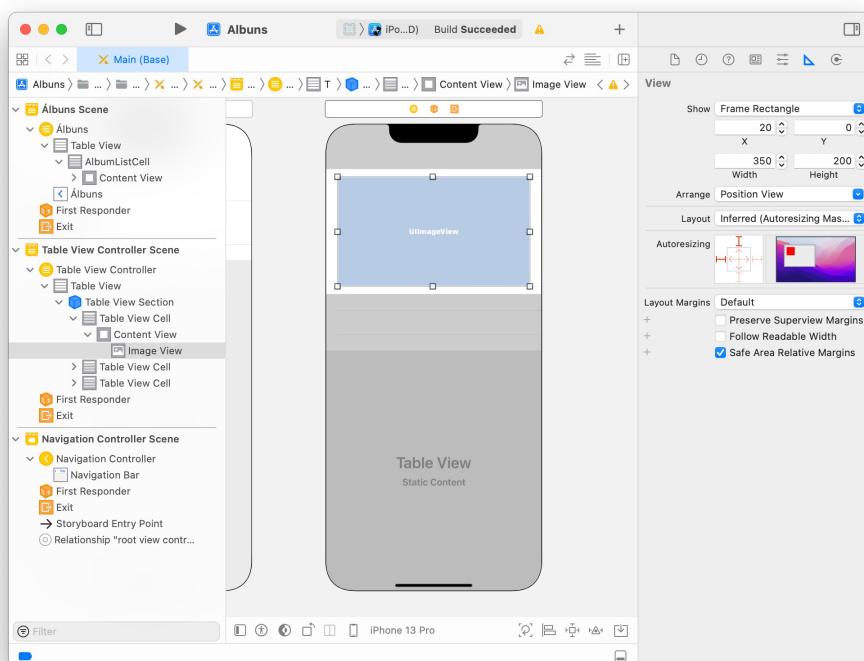

7. Adicione um Image View.

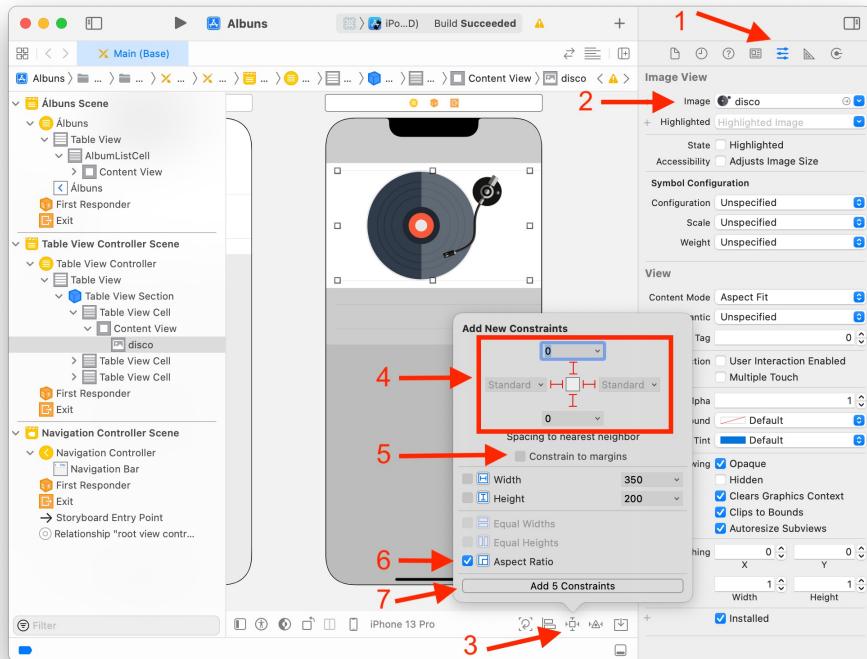

## 8. Adicione o Image View no Content View do primeiro Table View Cell.

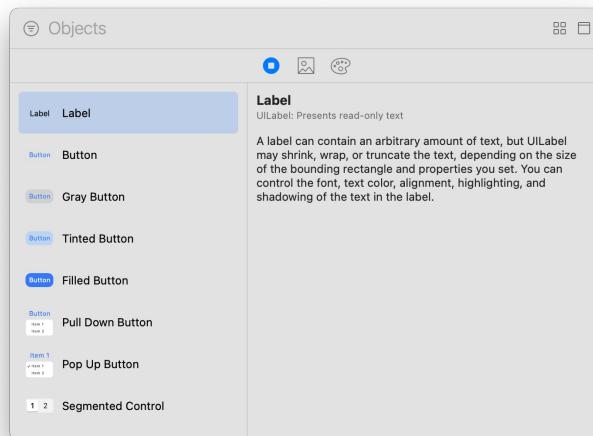

## 9. Centralize o Image View e alinhe suas bordas nas linhas guia.

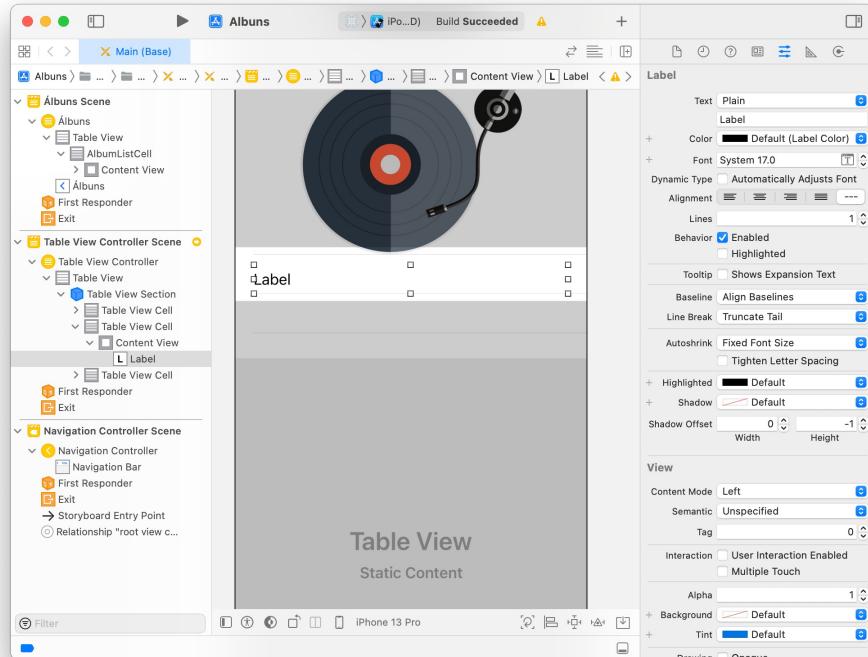

10. Selecione a imagem do Image View e adicione as regras de posicionamento.

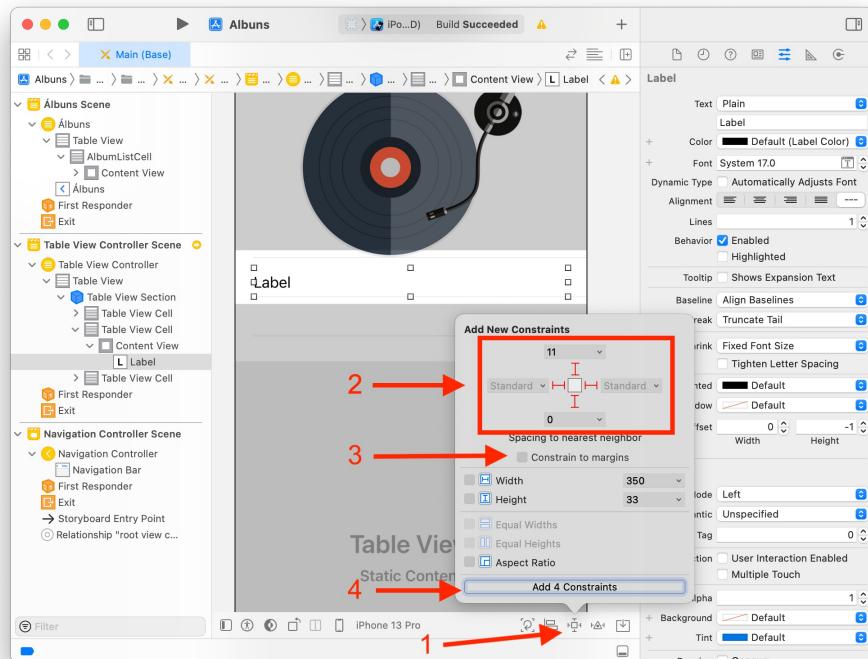

11. Adicione um Label ao segundo Table View Cell.

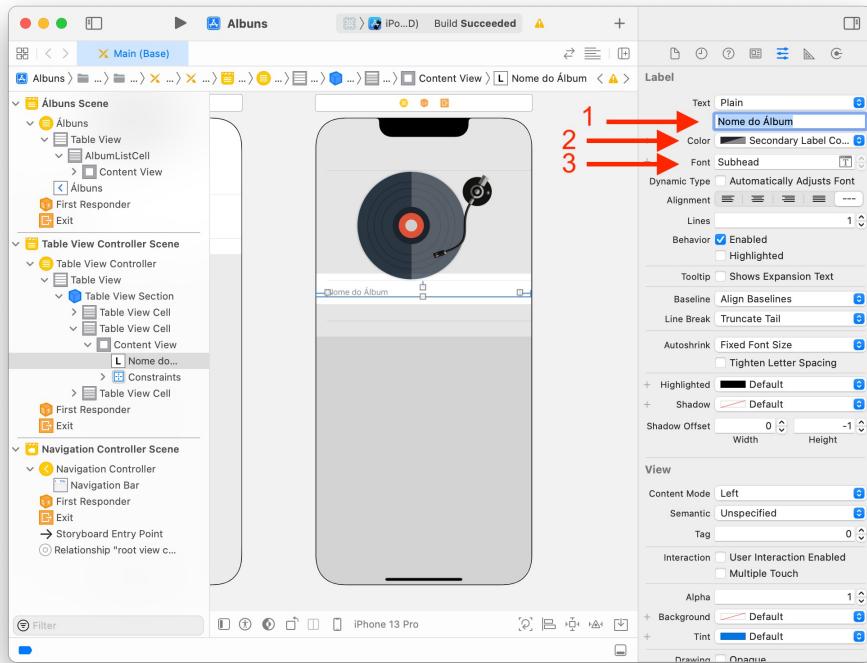

12. Centralize o Label, ajuste suas laterais nas linhas guias e a base no limite inferior.

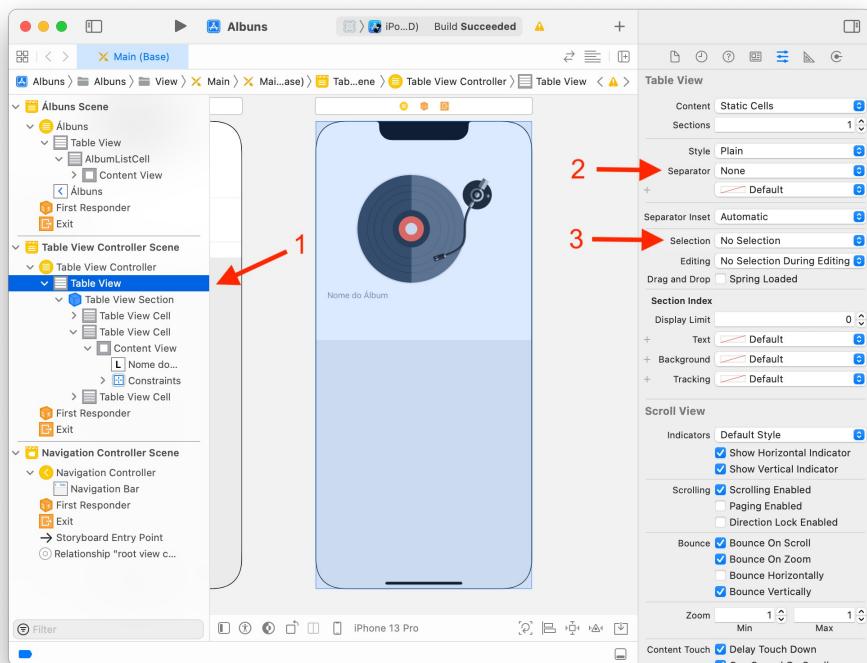

13. Adicione as regras de posicionamento.

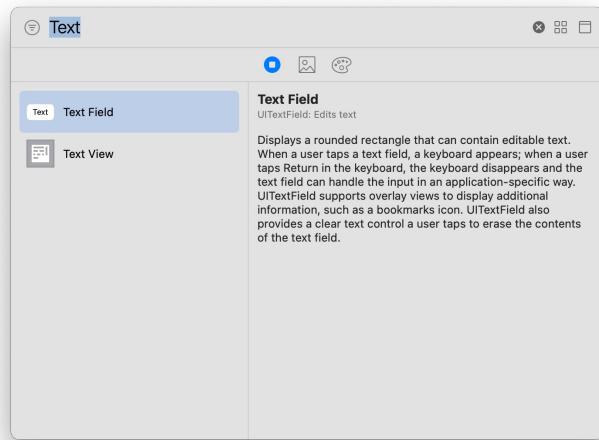

14. Ajuste o título para **Nome do Álbum**, a cor para **Secondary Label Color** e a font para **Subhead**.

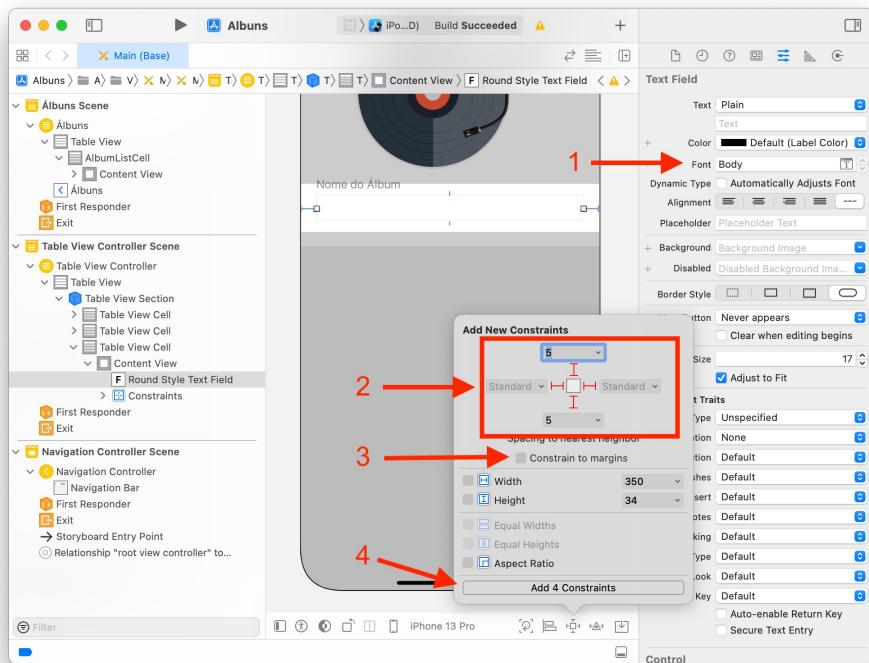

15. Selecione o Table View, altere o Separator para **None** e o Selection para **No Selection**.

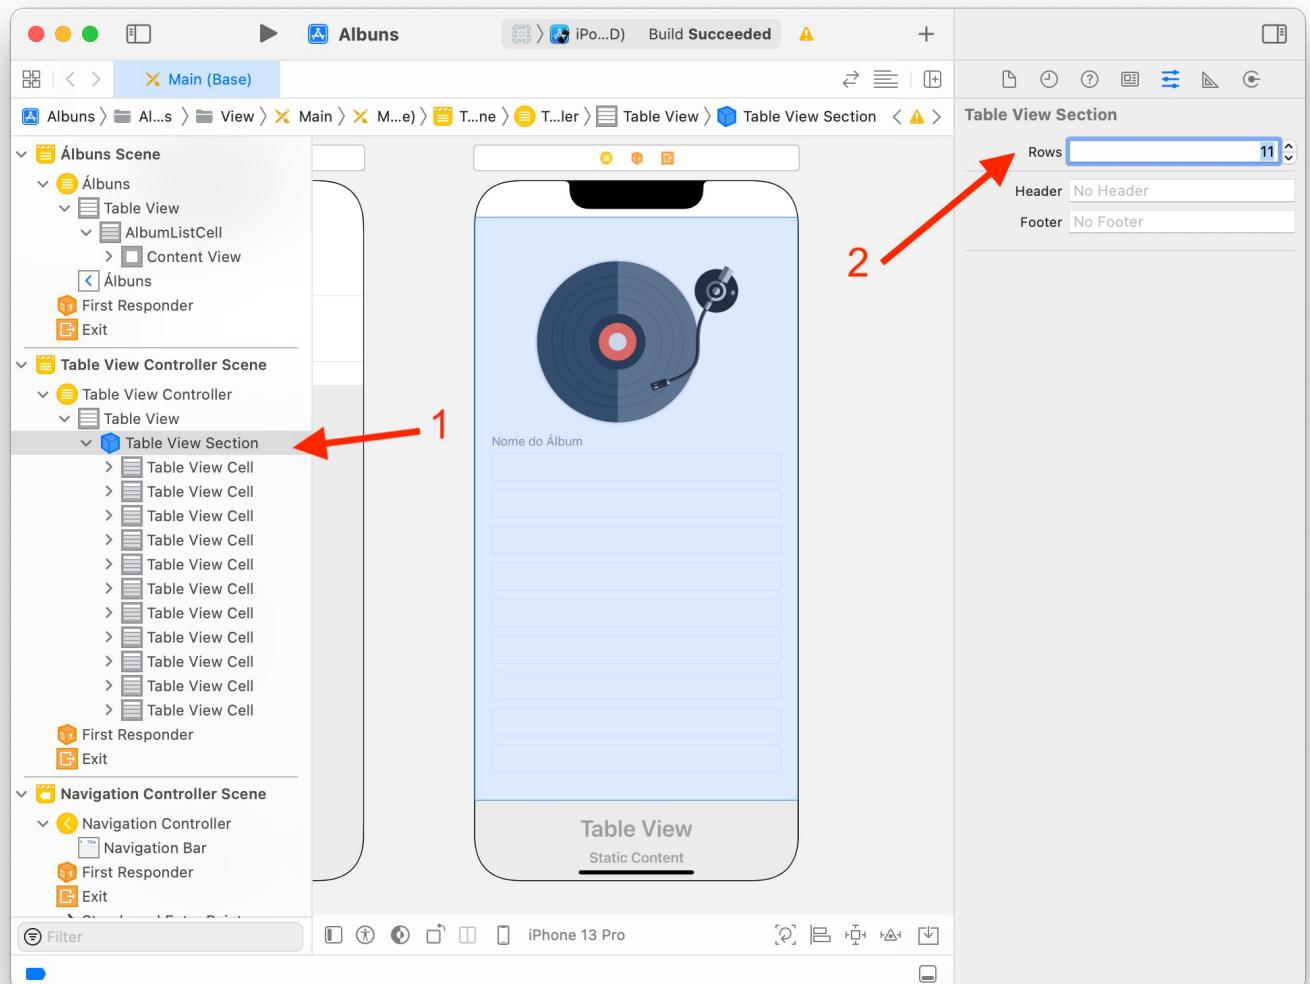

16. Adicione um TextField no Content View do terceiro Table View Cell.

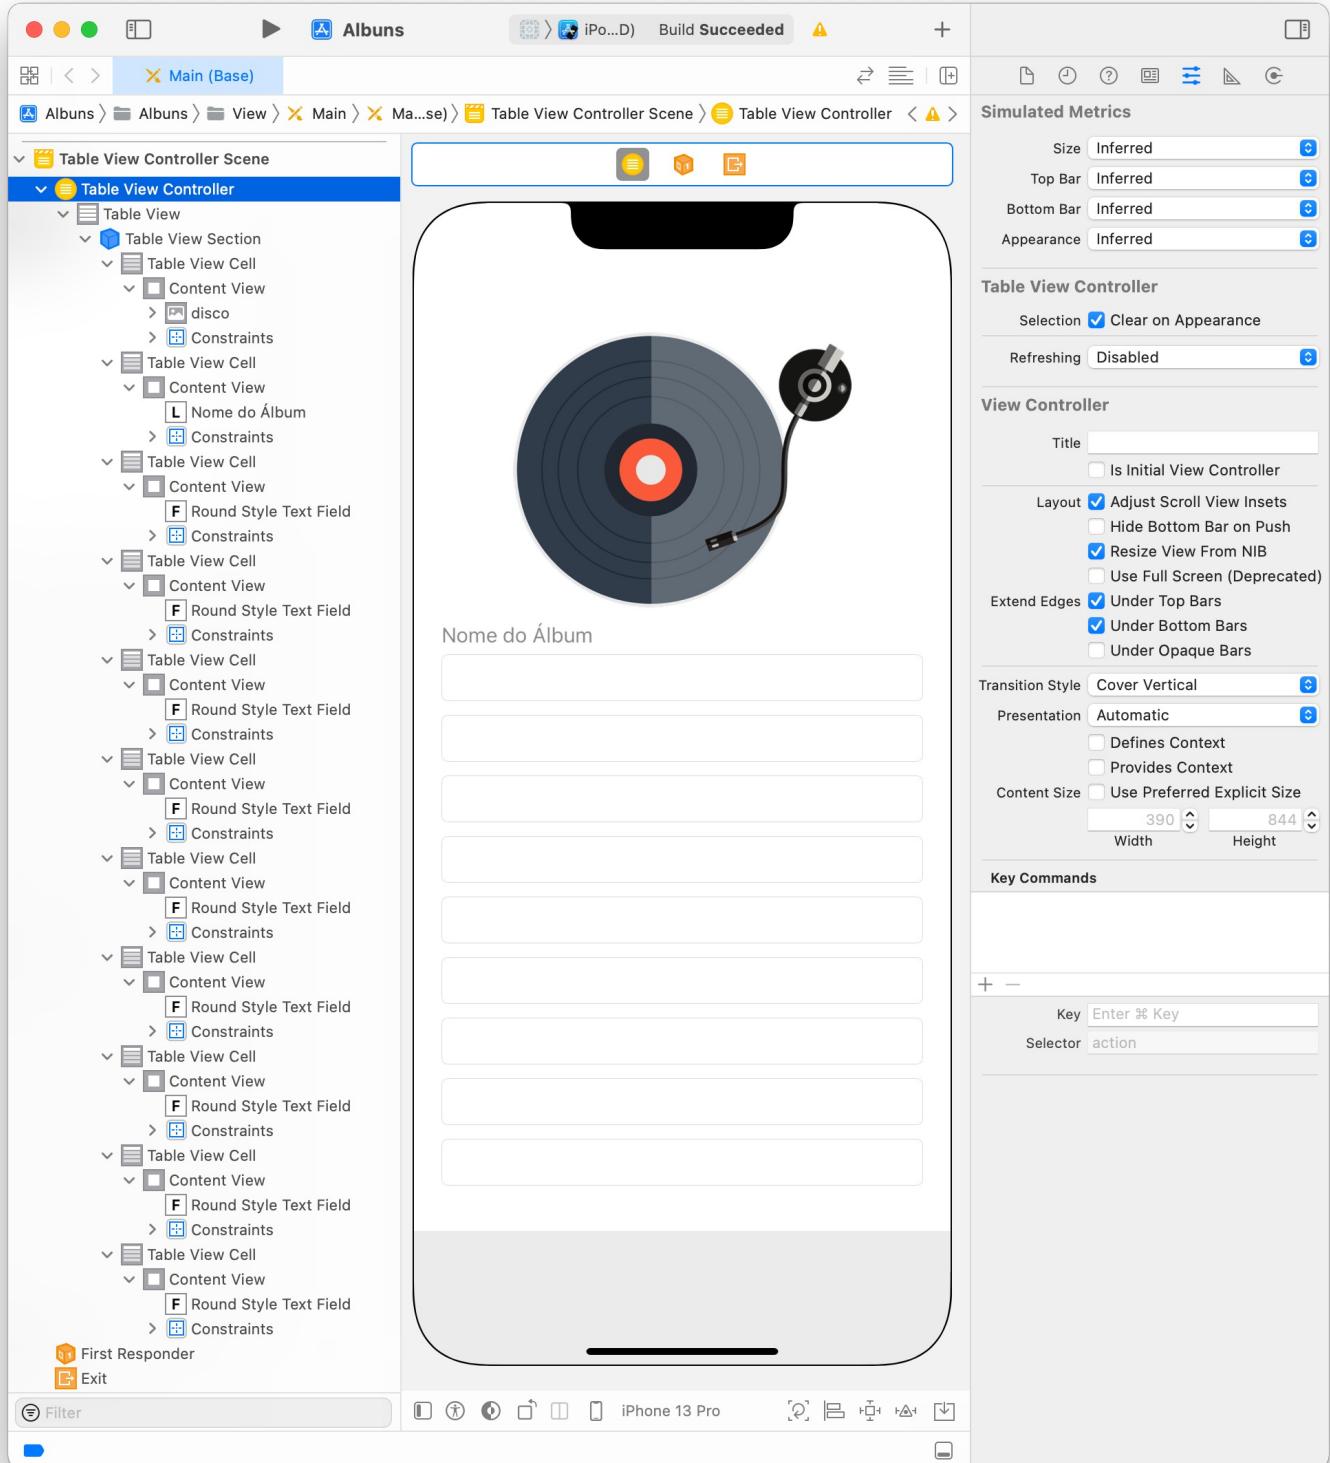

17. Centralize o Text Field, troque a fonte para Body, ajuste suas laterais nas linhas guias e adicione as regras de posicionamento.

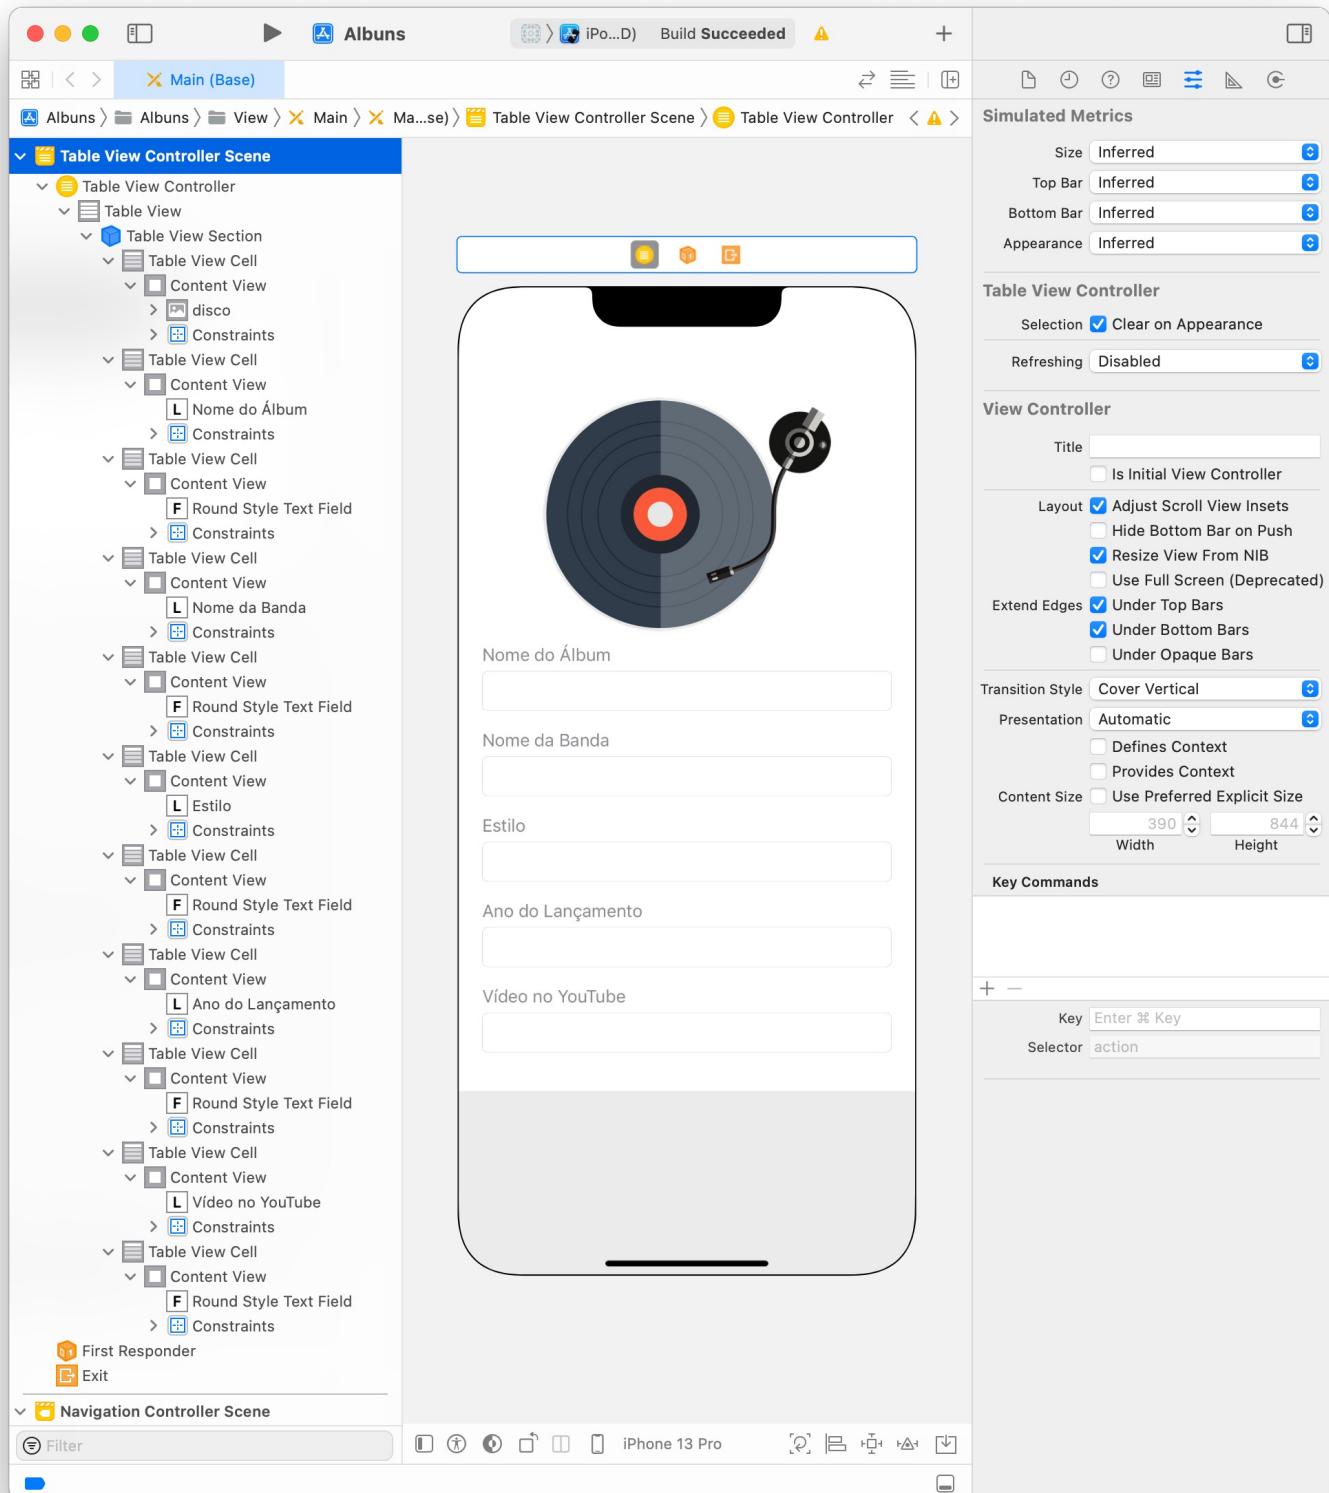

18. Selecione o Table View Section e modifique o número de linhas para 11.

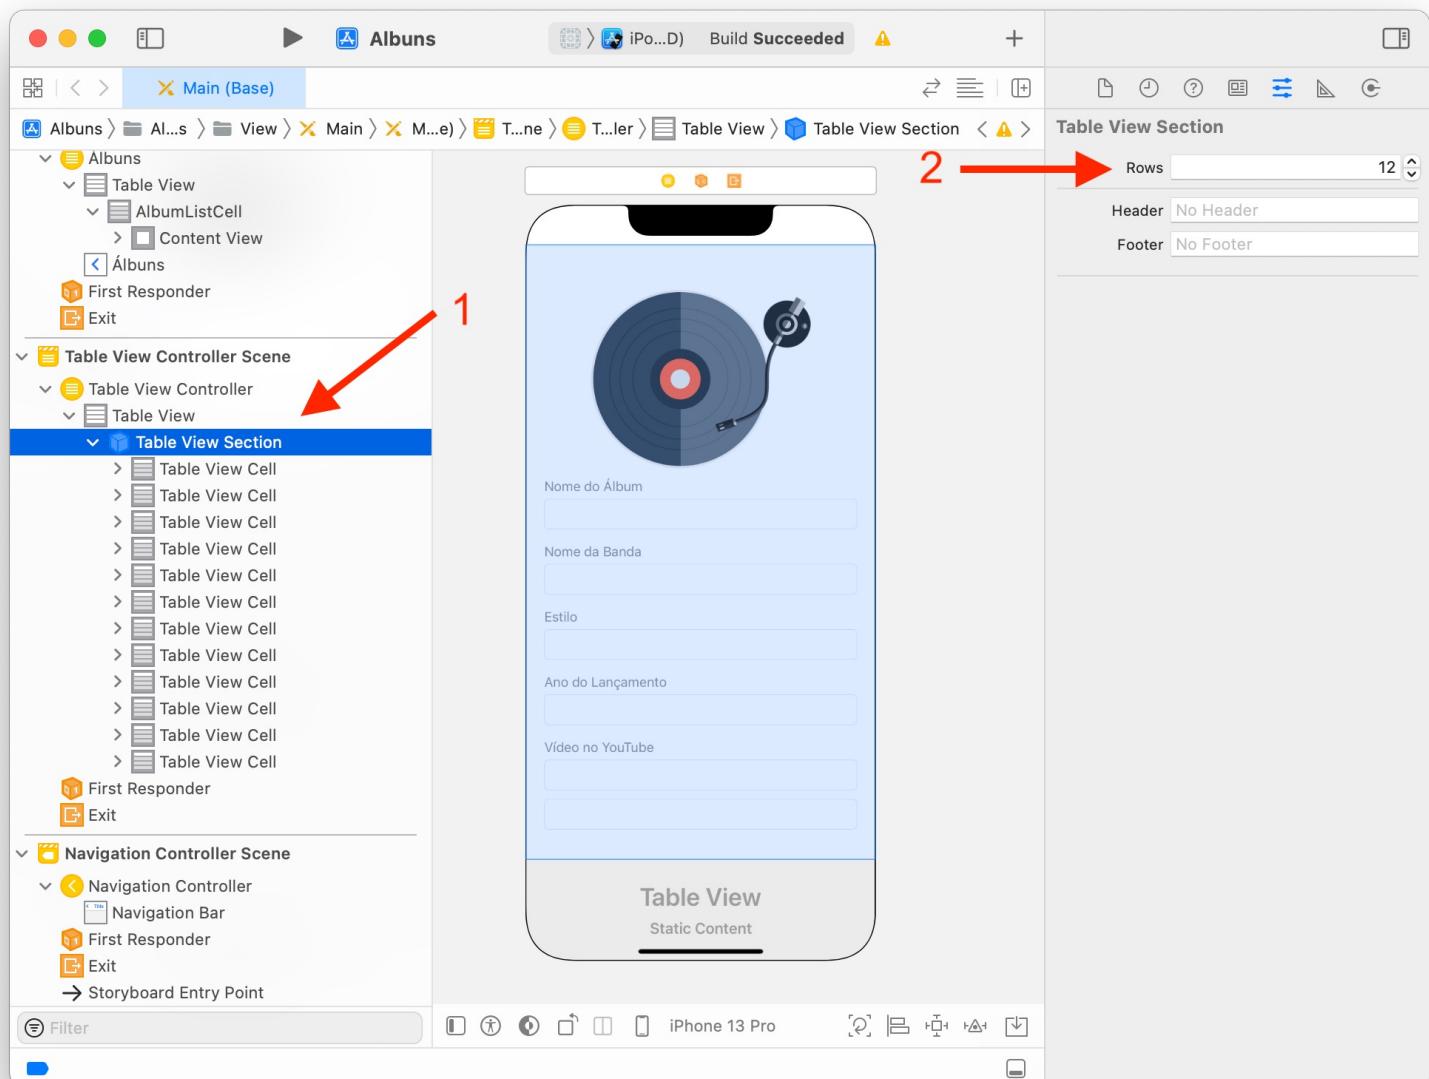

19. Nos Table View Cell pares 4º, 6º, 8º e 10º troque o TextField por Label seguindo os passos de 11 a 14 .

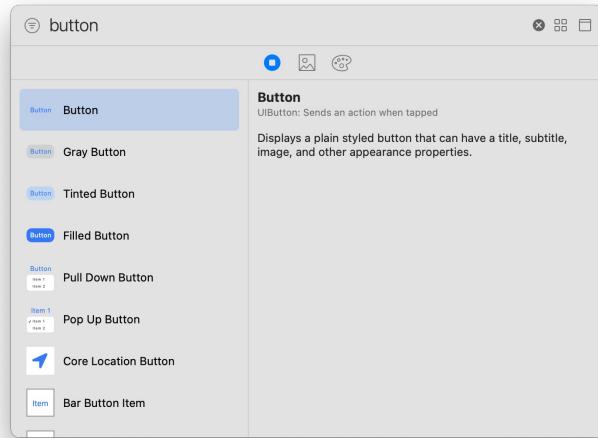

20. Após ter ajustado o título dos Labels e configurado as regras de posicionamento conforme slide 13, teremos esta configuração.

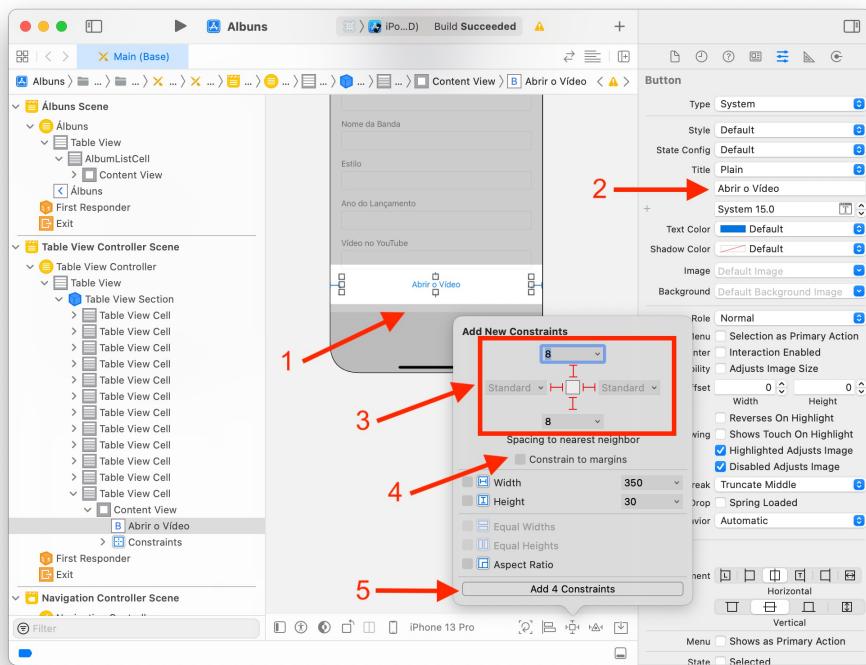

21. Acrescente mais uma linha ao Table View, alterando o número de linhas para 12.

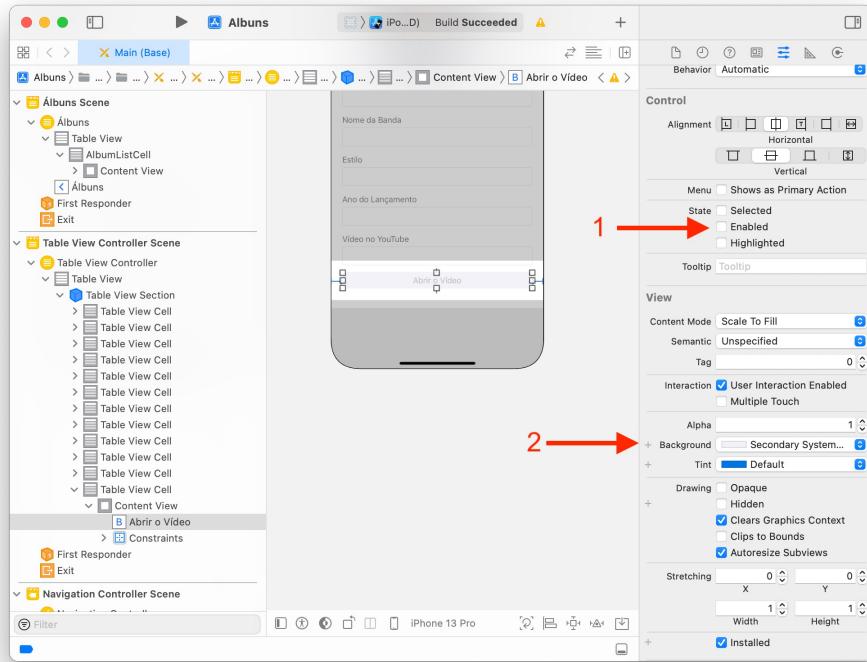

22. Adicione um Button no Content View na última TableView Cell e remova o Text Field existente .

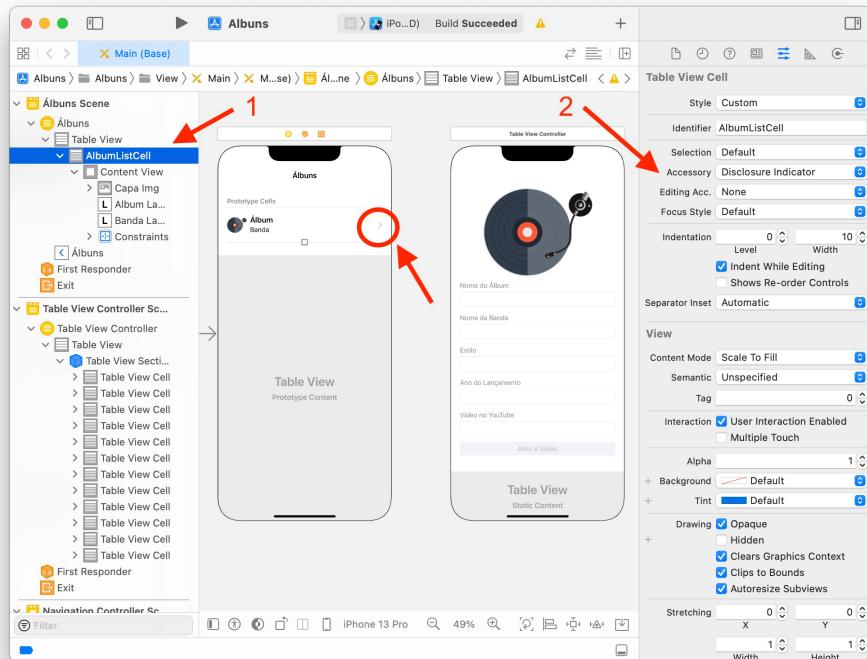

23. Centralize o Button, alinhe as laterais nas linhas guia troque o título e acrescente as regras de posicionamento.

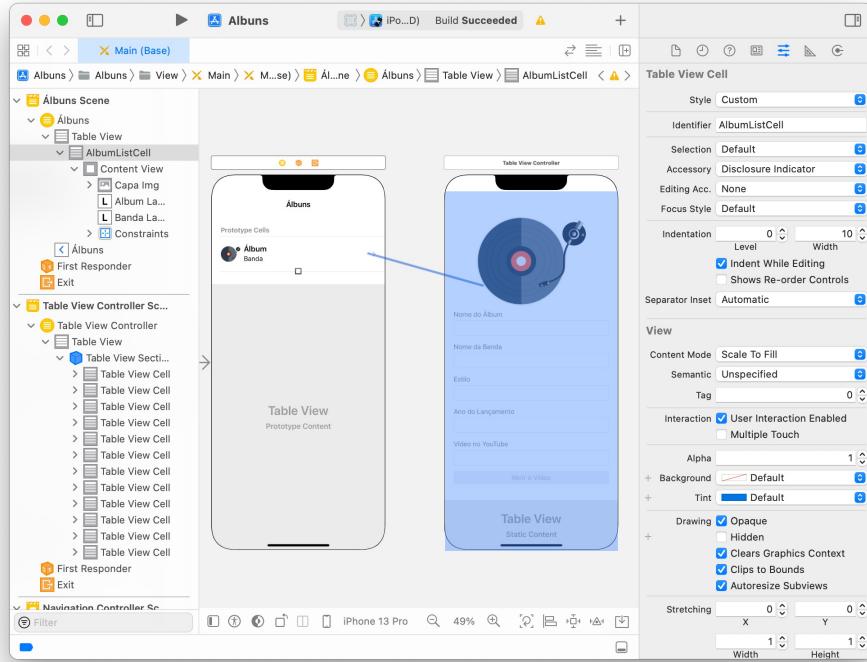

24. Desabilite o Button e troque a cor de fundo para Secondary System Background.

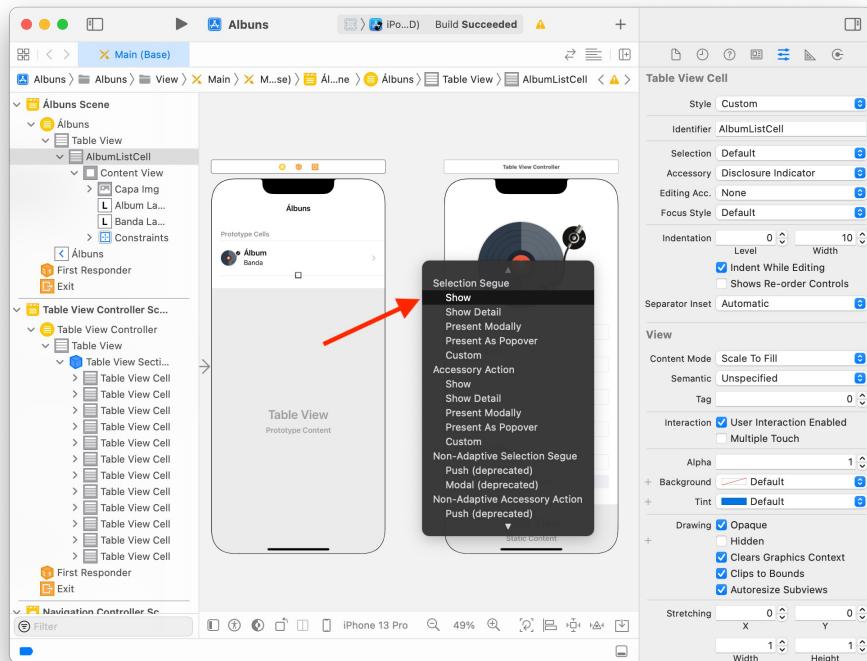

25. Selecione o AlbumListCell no AlbumViewController e troque o Accessory para Disclosure Indicator.

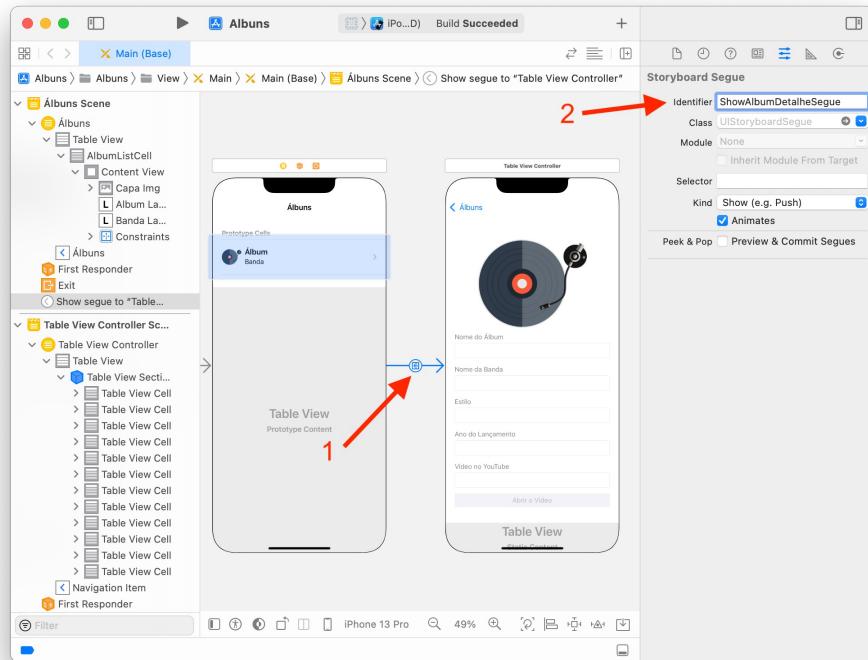

26. Tecle **control + clique** no AlbumListCell e arraste para o Novo Table View Controller.

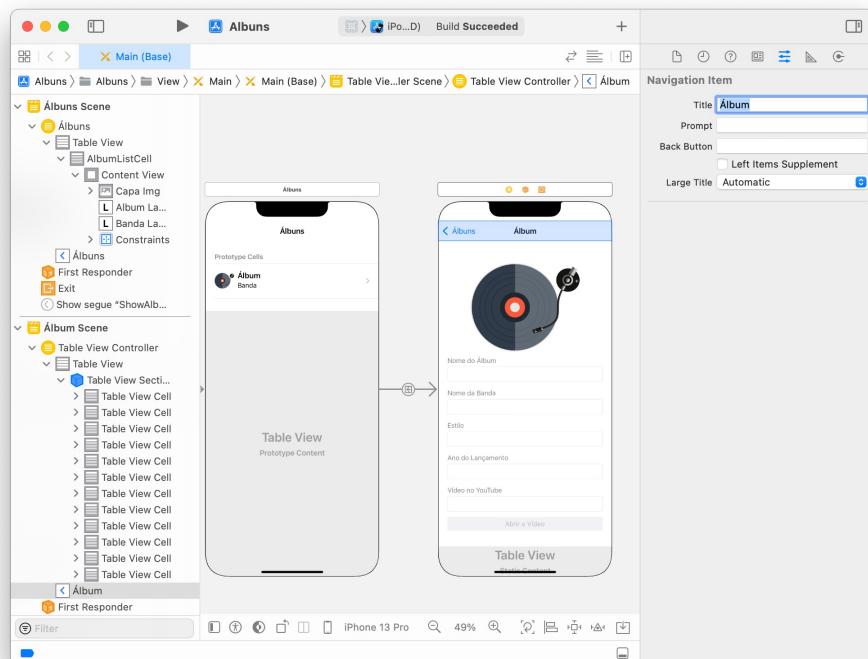

27. Ao liberar o control + clique aparecerá um menu, selecione Show.

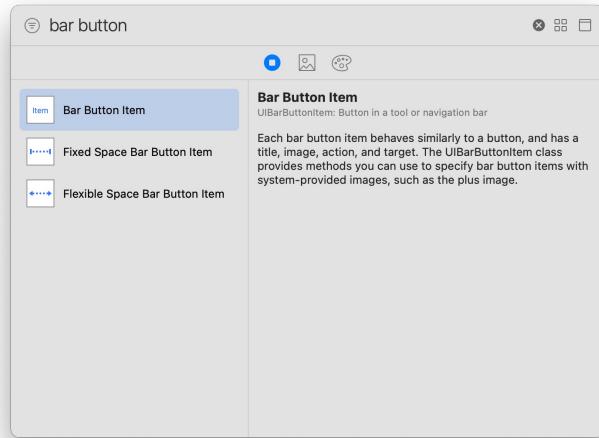

28. Selecione o Segue e adicione o identificador com o texto idêntico ao utilizado na classe que controlará este vínculo.

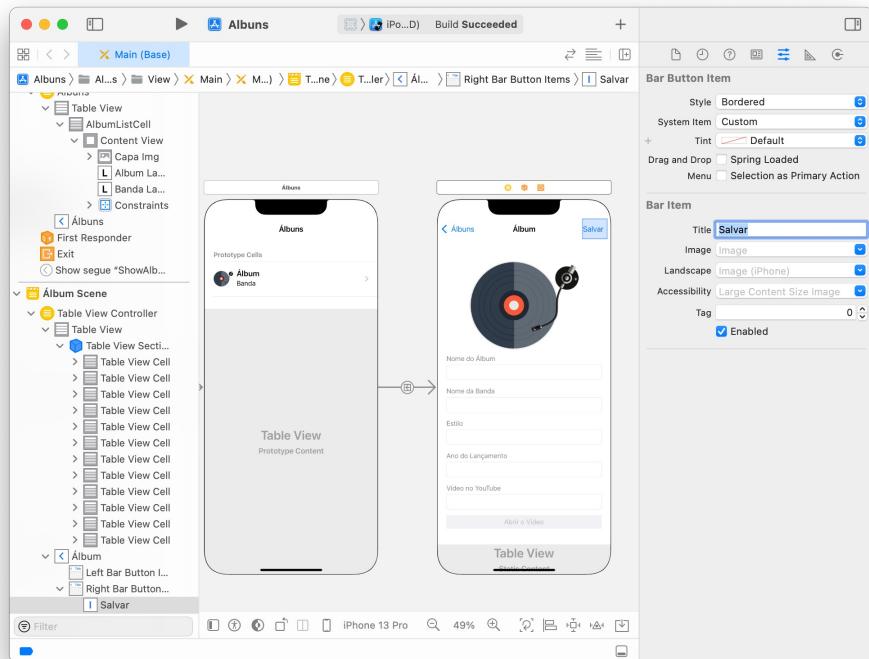

29. Selecione o Navigation Bar no Table View Controller e adicione o título.

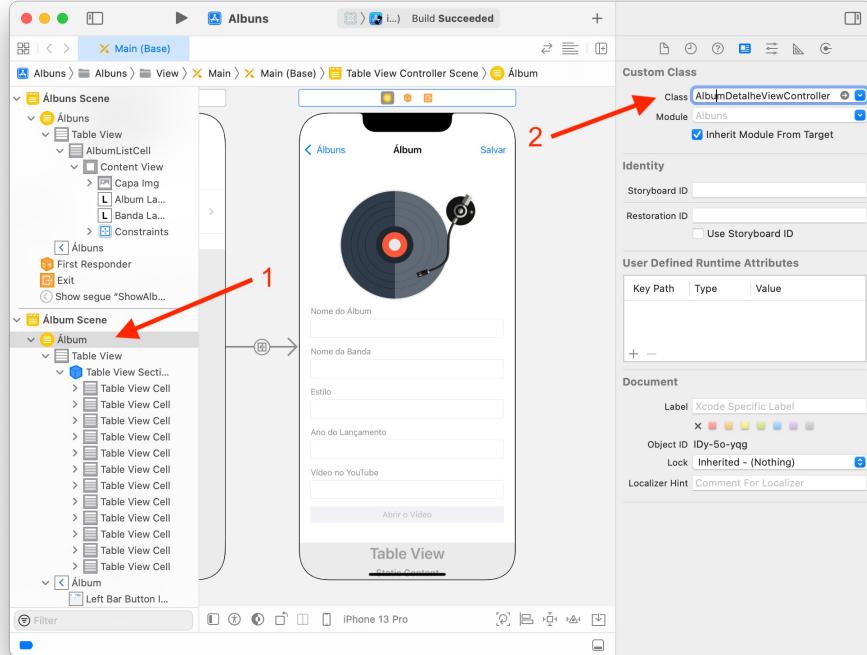

### 30. Adicione um Bar Button no Navigation Bar.

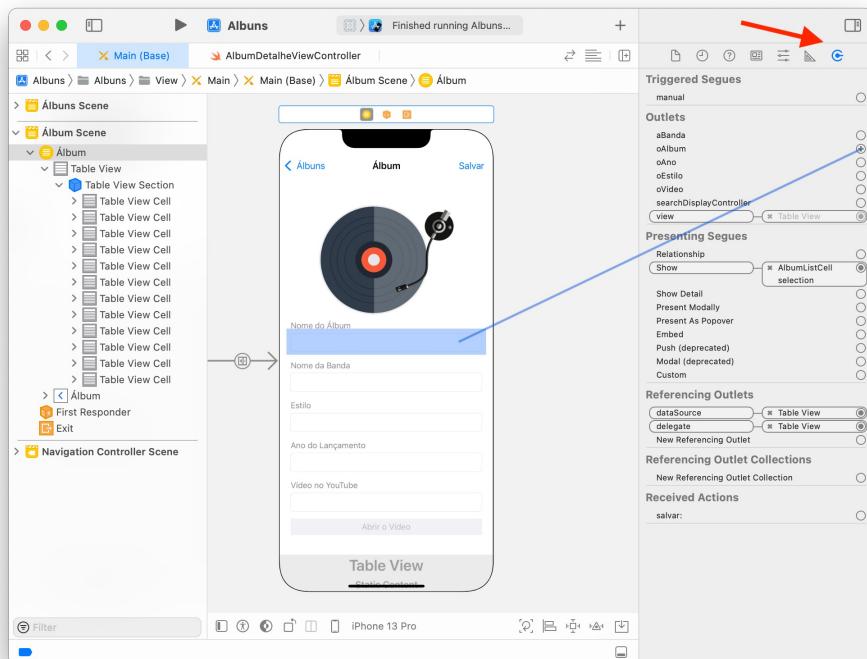

### 31. Posicione o Bar Button a direita no Navigation Bar e troque o título.

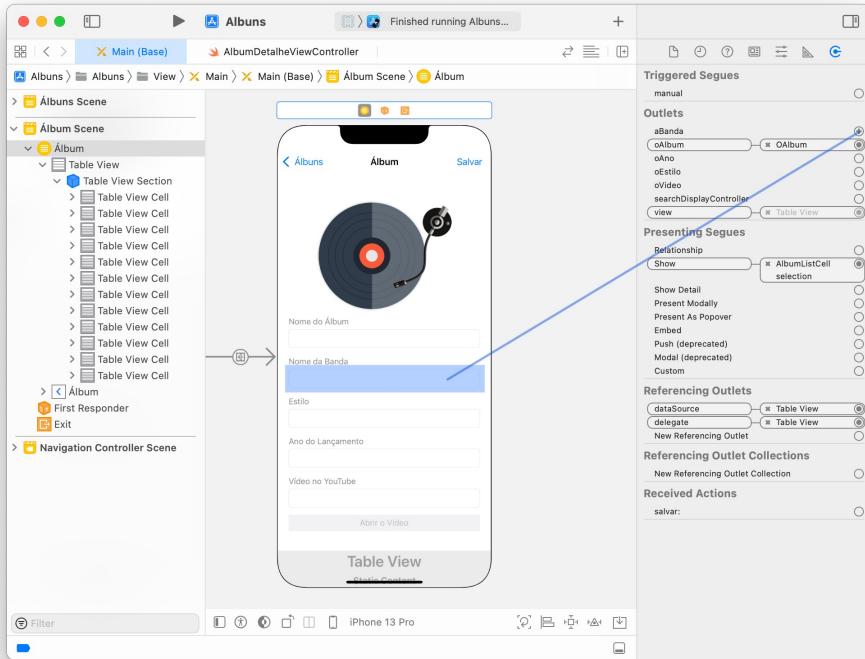

32. Selecione o Table View Controller e configure a classe responsável por este layout.

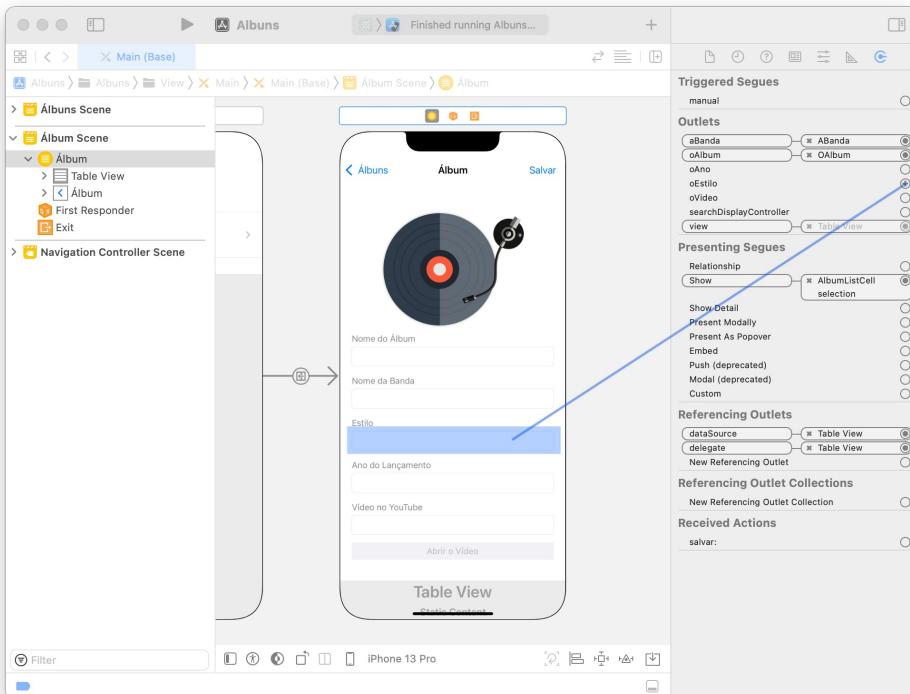

33. No inspetor de conexões clique, segure e arraste o **oAlbum** com o Text Field do nome do álbum.

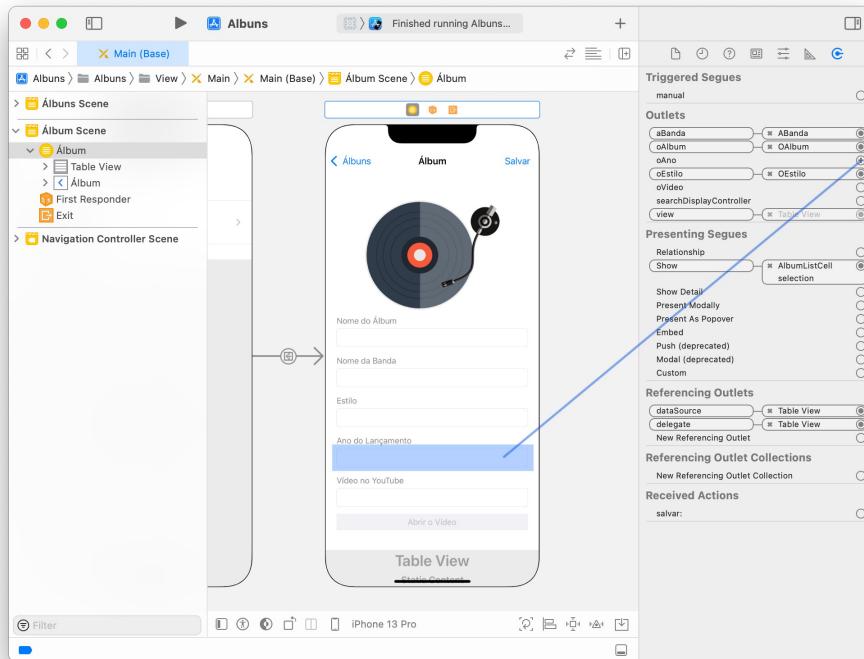

34. Clique, segure e arraste o **aBanda** com o Text Field do *nome da banda*.

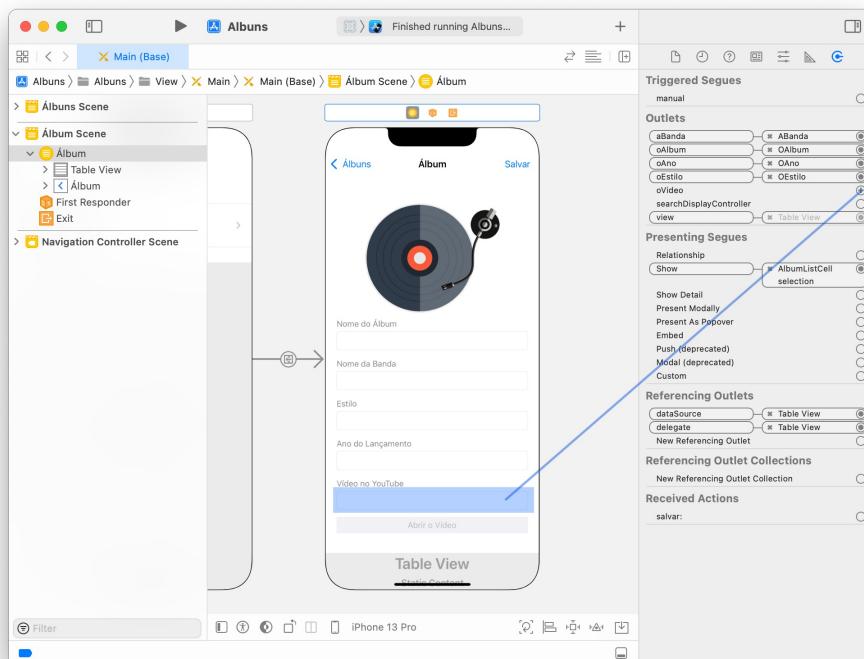

35. Clique, segure e arraste o **oEstilo** com o Text Field do *estilo*.
